21st CENTURY LEARNING SKILLS

- The program provides a way to explore and engage in activity-based approaches to all academic subjects, with a focus on history, science, literacy, and project based learning.
- Integrating hands-on making across the curriculum engages diverse learners in academic subjects, igniting curiosity, wonder, imagination, and meaningful making
- The new common core standards can be successfully implemented through culturally responsive arts-centered teaching strategies applied across all disciplines.
- These are addressed:
 - Critical thinking
 - Creativity
 - Collaboration
 - Communication
 - Information literacy
 - Media literacy
 - (Ancient) Technology literacy
 - Flexibility
